

GUIDE TO HEALTHCARE SERVICES FOR IMMIGRANT CITIZENS RESIDING IN VENETO

Project co-funded by the European Union

MINISTERO
DELL'INTERNO

ASYLUM, MIGRATION AND INTEGRATION FUND (FAMI) 2014-2020

INTRODUCTION

The Veneto Region has been successfully striving for years to channel the European funds that allow it to implement its policies for the integration of foreign citizens residing in Veneto.

In particular, within the framework of the Asylum, Migration and Integration Fund (FAMI 2014-2020), it has implemented, in partnership with the seven capital municipalities, the "IMPACT Veneto" project, which includes among its specific objectives the promotion and innovation of the integrated system of territorial services and information about them with a view to greater accessibility and usability.

With this in mind, among the various activities of the project is the new edition of this guide: a user-friendly tool, translated into several languages, to facilitate people living in our territory in accessing the services offered by the National Health Service. This guide also aims, with a specific section dedicated to women's health, to outline the requirements and characteristics of a new model of information, guidance and accompaniment aimed at immigrant women, to make them aware and independent in accessing and using the relative services.

Councillor for Migration Flows
Cristiano Corazzari

HOW HEALTHCARE WORKS

in Italy and in the Veneto Region

WHAT IT IS

The National Health Service (SSN) is the set of facilities and services that must ensure access to health care services according to principles of universality, equity and equality.

The SSN is governed by the **State**, which decides the **Essential Levels of Care (LEA)**, and by the regions, which are responsible for **organize and guarantee the services** and the healthcare essential for health protection through the **ULSS**.

There are **9 ULSS** in the **Veneto Region**, each with a scope of responsibility:

- ULSS 1 Dolomiti
- ULSS 2 Marca Trevigiana
- ULSS 3 Serenissima
- ULSS 4 Veneto Orientale
- ULSS 5 Polesana
- ULSS 6 Euganea
- ULSS 7 Pedemontana
- ULSS 8 Berica
- ULSS 9 Scaligera

THE ORGANIZATION OF THE ULSS

Each ULSS consists of three main structures:

- the **Hospital**, to treat **acute and post-acute** patients.
- the **District**, which **operates throughout the territory** to provide: the **General Practitioner** and **Primary Care Pediatrician**; specialist examinations and services; **Counselling Centres** for childhood, motherhood and the family; information and assistance through **district administrative offices**.
- the **Prevention Department**, which **protects the health of the population** with **screening and prevention**; prevents infectious diseases through the **Public Health and Hygiene Service**; protects **food safety** and **animal welfare**.

WHAT TO KNOW

Enrolment in the National Health System and issue of the health insurance card: essential to use health services and benefits in Italy.

General Practitioner - Primary Care Pediatrician: you turn to them when you are unwell for assistance, advice and trusted answers.

Service of Continuity Assistance (formerly the Medical Guard), 118 and Emergency Room: emergency facilities to turn to in very serious cases that cannot wait.

Booking visits and examinations: General Practitioner's referral is required. They can be booked at hospitals, some health district offices, by phone through the Single Booking Center (CUP) or through the "sanitàkmzero" portal.

Co-pay for examinations, visits and medicines: the contribution each citizen makes for services and medicines.

Exemptions: some categories of people are entitled to exemption from co-payment or a reduction of it (for particular diseases or due to age, income, unemployment).

The Family Counselling Centre: a social-health service that offers free care and support to the family, the pregnant woman, and for child protection.

Public Health and Hygiene Service: for any information on vaccination and particular services (e.g., hygienic-sanitary suitability of the accommodation).

www.salute.gov.it

<https://salute.regione.veneto.it/>

Enrolment in the **NATIONAL HEALTH SYSTEM (SSN)**

WHAT IT IS

In order to have healthcare in Italy, it is **indispensable to register with the National Health System (SSN)**, which can be **compulsory and free or voluntary**. Both registrations entitle to the **health insurance card** and **all services provided by the SSN in the national territory** with the same status as the Italian citizen.

The health insurance card, which has the same duration as the residence permit, is an **individual document** that entitles the holder to the choice of a General Practitioner, Prime Care Pediatrician, free hospitalization at public and contracted hospitals, specialized medical examinations and visits, medicines and mandatory vaccinations.

In order to access individual healthcare services, it is mandatory to have the request issued by your doctor and to make the booking according to the procedures defined by the relevant ULSS.

Some services involve the payment of a public healthcare cost-sharing fee (co-pay) as for Italian citizens. Total or partial exemption from co-payment is provided for recognized specific conditions of income, age, disability and for certain diseases.

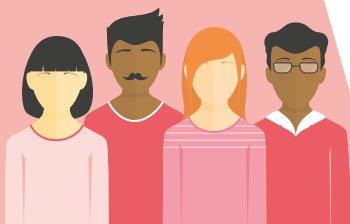

In case of loss of the health insurance card, contact the district administrative offices of the ULSS to which you belong.

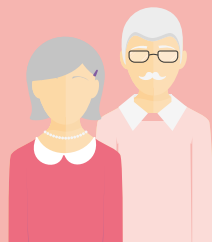

FOR WHO

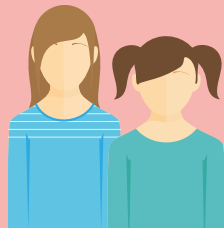

All non-EU foreign citizens with employment (self-employed or subordinate), those registered on the employment lists, holding a residence permit (or application for a permit) for employment or self-employment, family reasons, asylum, subsidiary protection, special cases, special protection, temporary protection, asylum application, foster care, acquisition of citizenship, medical treatment for pregnant women or in the six months following the birth of a child are entitled to compulsory and free registration with the SSN.

Parents over 65 years of age who entered Italy for family reunification after November 5, 2008 are also entitled to compulsory and free registration with the SSN.

Unaccompanied foreign minors, even while awaiting the issuance of a residence permit, as a result of legal alerts after they are found in the national territory, and in any case all minors regardless of the status of stay regularity are entitled to compulsory and free registration with the SSN, resulting in the right to a primary care pediatrician from 0 to 14 years of age and a general practitioner from 14 to 18 years of age.

All foreign citizens who regularly stay in Italy for a period of more than three months but who do not perform any paid work are entitled to voluntary registration with the SSN: students (even for a period of less than three months), religious or diplomatic personnel, foreigners participating in volunteer programs, holders of residence permits for elective residence, and all the categories who do not qualify for compulsory registration.

WHAT YOU NEED TO DO

Compulsory and free registration, of the same duration as the residence permit, takes place at the **district administrative offices** of the ULSS to which you belong. It is important to bring your residence permit, self-certification of residence (or a statement of actual residence, as it appears, on the residence permit), tax code, and the receipt showing the submission of the application for the first residence permit issued by the post office.

While waiting for the issuance of the permit for family reasons, you must show the entry visa, the receipt issued by the post office certifying the successful submission of the application for a residence permit and the non-authenticated photocopy of the dispensation issued by the Immigration Desk.

Voluntary enrolment is to be made by paying an **annual lump sum contribution** which refers to the calendar year January 1-December 31 (calculated on the basis of what was earned the year prior to enrolment), to a regional bank account that can be obtained from the ULSS where you want to enrol or via F24.

HEALTHCARE

for illegally present foreign citizens

Health is a fundamental right protected by Article 32 of the Italian Constitution.

Foreign citizens who are in the national territory in an irregular condition, that is, with an expired residence permit or who have entered the national territory but do not have the right to remain in Italy, are nevertheless entitled to receive in public and accredited centers any urgent or otherwise essential medical treatment, even on a continuous basis, for illnesses and injuries, and are also entitled to have preventive medicine programs extended in order to protect individual and collective health.

Urgent are those treatments that cannot be deferred without danger to life or damage to the person's health.

Essential are those diagnostic and therapeutic healthcare services related to diseases that are not dangerous in the immediate and short term, but over time could result in greater health damage or risk to life.

The following health treatments are also guaranteed:

- The assistance services necessary for the protection of pregnancy and maternity, with equal treatment with Italian citizens;
- Child health protection;
- Vaccinations as part of collective prevention campaign interventions;
- International prophylaxis interventions;
- The prophylaxis, diagnosis, and treatment of infectious diseases.

For people not registered with the SSN, services are with a fee. However, in the event that the applicants do not have sufficient economic resources, the services are provided free of charge, upon presentation of a declaration of indigence. In fact, there is a ban on reporting to the authorities by health care providers who are treating the illegal foreign, so that effective protection of the person and their integrity is guaranteed.

To facilitate access to facilities and ensure continuity of care, it is provided that the irregular foreign is assigned a regional STP code (Temporarily Present Foreigner) that guarantees anonymity.

This code is valid for one year and can be renewed if the foreigner citizen remains in the country.

FOR WHO

Non-EU citizens not in compliance with entry and residence regulations.

WHAT YOU NEED TO DO

The STP code can be issued when healthcare is first provided (or preventively, particularly in preventive programs, to facilitate access to healthcare).

GENERAL PRACTITIONER

How to choose, change and revoke your doctor

WHAT IT IS

All people enrolled in the National Health System (SSN) have the right to **choose their General Practitioner** (Family Doctor) and, for children under 14 years of age, their Primary Care Pediatrician, who are the **first point of reference for health and medical needs**.

THE MAIN TASKS OF THE GENERAL PRACTITIONER ARE:

Health information and health promotion

General medical examination (both in the clinic and at home) also with an urgent nature

Medications, intravenous injections, vaccinations, etc.

Drug prescription

Request for specialist visits and proposals for hospitalization

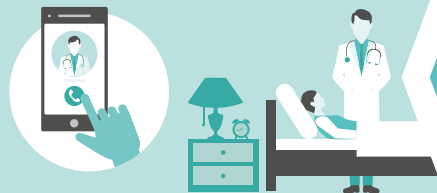

Certificates of fitness for non-competitive athletic activity in schools

Sickness certifications for employees

Outpatient visits are done in the doctor's office on the days and times displayed at the outpatient clinic. Some doctors allow you to make an appointment.

Home visits (if the patient is unable to go to the outpatient clinic), are made on the same day if requested before 10 a.m. After that time, the doctor will conduct the examination by 12 a.m. of the following day. Urgent calls will be answered by the doctor as soon as possible.

Some medical certificates are with a fee, such as certifications for civil disability application and certifications of fitness for non-competitive sports activities if not required by the school. Occasional outpatient and home visits made by a General Practitioner if you are in a ULSS other than your own are also for a fee.

FOR WHO

All citizens who, after enrolling in the National Health Service (SSN), want to choose, change or revoke their General Practitioner.

WHAT YOU NEED TO DO

To choose, change or revoke your General Practitioner, contact the **district administrative offices of your ULSS** by presenting your health insurance card. If the request for the doctor is made by a person other than the person concerned, a written proxy is required. Check individual ULSS sites for the possibility of making a choice, change or revocation online.

When to go to the **SERVICE OF CONTINUITY ASSISTANCE** (formerly the Medical Guard)

WHAT IT IS

The task of the **Service of Continuity Assistance (formerly the Medical Guard)** is to **provide free of charge** during night, pre-holiday and holiday hours, healthcare services that cannot be postponed to the next day (**not deferrable**). Its function, therefore, is integrated with that of the General Practitioner and the Primary Care Pediatrician.

The Continuity Assistance doctor may respond by **telephone advice, outpatient visit or home visit**. Or, if they deem it appropriate, they may refer the patient to the Emergency Room or 118.

The Service of Continuity Assistance doctor can make **pharmaceutical prescriptions** for non-deferrable therapies and **sickness certifications** (limited to days coinciding with holidays, pre-holidays and night shifts): for further needs, it is necessary to go to the General Practitioner.

FOR WHO

You can use the service if you are **enrolled in the National Health System (SSN)** and resident or domiciled in Veneto.

Citizens who **do not have the health insurance card** issued by the Veneto Region can still access the service but are required to **pay** for services according to the following fee schedule:

repetitive medical procedures: 5.00 euros

outpatient visit: 25.00 euros

home visit: 40.00 euros

WHAT YOU NEED TO DO

The service can be accessed through a **dedicated telephone number** that each ULSS provides, remembering to always provide general information (first name, last name, age, address, phone number) and an accurate description of the symptoms.

The **open-access outpatient clinic** is available only in some ULSS, in which it is possible to go to the relevant territorial office without an appointment. However, it is always recommended to call before going.

WAITING **NO**
None

COST

Free (For citizens enrolled in the SSN who are residents and domiciled in Veneto)

SERVICE OF CONTINUITY ASSISTANCE (formerly the Medical Guard)

WHEN TO CALL 118

WHAT IT IS

The **118** is a public service **reserved for medical emergencies**, active throughout the Italian territory, **completely free of charge**. You can call it from both landline and mobile phones (even when you have no credit).

Calling 118 puts you in touch with a **Operations Center** which assesses the **gravity of the situation** and, if necessary, dispatches personnel and emergency vehicles (first response vehicle, ambulance, helicopter) to give immediate assistance and arrange for transport to the hospital.

FOR WHO

Call 118 exclusively to request **urgent intervention** to avoid the risk of life, the loss or the impairment of an organ. Access to the Emergency Room is also granted to foreigners irregularly present in the territory. Access to health facilities by a foreign citizen irregularly present in Italy does not result in reporting to law enforcement authorities, except in cases where reporting is required by law.

WHAT TO DO IN CASE OF EMERGENCY:

Call 118 and wait to speak with the Operations Center

PROVIDE THE OPERATOR, AS CALMLY AS POSSIBLE, WITH INFORMATION REGARDING:

Location and phone number from which you are calling: address with house number, municipality and other useful references

Type of emergency: illness, traffic accident, domestic accident, work accident, environmental accident (fire, explosion, gas leak)

Health data: state of consciousness, breathing, visible bleeding

IT IS ALSO NECESSARY TO:

Report any dangerous situations

Do not interrupt the communication before having received permission from the operator

Keep the line used to call for help free: you may be contacted for more information

WAITING NO
None

COST

Free (in cases of urgency and/or emergency)

INFO

<http://www.salute.gov.it/portale/home.html>
<https://www.aulss8.veneto.it/oggetto.php/363>

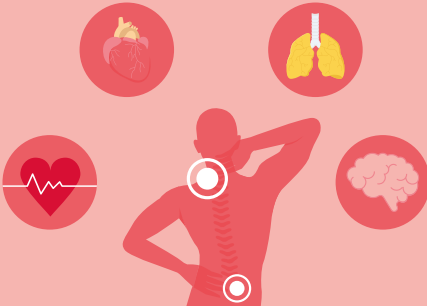

When to go to the **EMERGENCY ROOM**

WHAT IT IS

The **Emergency Room** is a hospital facility dedicated to **immediate treatment** of cases of **emergency and urgency**. First aid is provided here and, if the doctor deems it necessary, you stay for a short period of observation.

In the most serious cases, from the Emergency Room you will be hospitalised in the appropriate department.

FOR WHO

The Emergency Room is addressed **exclusively for urgent acute problems that cannot be solved** by the General Practitioner, the Primary Care Pediatrician or the doctors of the Service of Continuity Assistance (formerly Medical Guard).

WHAT YOU NEED TO DO

You can go to the Emergency Room **on the indication of a doctor** (General Practitioner, Pediatrician, Emergency doctor), present spontaneously or **arrive by ambulance** after the emergency services were called.

At the entrance, you will be assigned a "**color code**", which is essential for deciding the **degree of urgency**:

RED
Life-threatening,
immediate
treatment

YELLOW
Urgent
interventions

GREEN
Minor issues

WHITE
No urgency

Access to the Emergency Room may end with the **admission** in the hospital or with the **return to your home**. In this case, the patient is provided with all the essential information that emerged with the exams, so that they can be shared with their General Practitioner.

The assessment of the "color code" at discharge is the exclusive responsibility of the Emergency Room doctor and determines whether an access fee (25.00 euros) must be paid and any services performed.

WAITING

In the Emergency Room, **the most serious patient** has priority, not who arrives first

COST

Those who have a **white code (exempt excluded)** assigned by the doctor at discharge are required to the co-payment.

HOW TO BOOK VISITS AND EXAMINATIONS

WHAT IT IS

The National Health Service (SSN) **guarantees the health of all citizens** through access to services based on health needs. To access SSN services, you must book an appointment with the **referral** from your General Practitioner.

Exceptions are urgent and emergency services (118, Emergency Room and Service of Continuity Assistance, former Medical Guard), as assistance is always guaranteed, 24 hours a day, all year round.

FOR WHO

All citizens who need to book a visit or examination with the National Health System (SSN) and have a referral from their General Practitioner.

WHAT YOU NEED TO DO

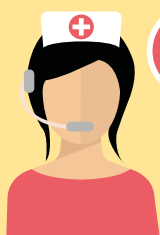

Most services are booked by contacting the **Single Booking Center (CUP)**. Reservations can be made **in person** at the CUP counters, **by calling the dedicated number** set up by each ULSS, through the website of the ULSS at which the service is to be performed, or even through the regional portal Sanità a Km Zero.

At the time of booking, it is necessary to **provide the patient's data** and have the referral from the attending doctor on hand.

Bookings can also be made through some Pharmacies that have joined a specific agreement.

Some services, on the other hand, must be booked **by contacting directly the Operating Unit** where the examination or visit you intend to take is carried out.

To cancel, always contact the CUP or any number dedicated to cancellation.
Cancellation must be made **at least 2 working days before the appointment date** to avoid having to pay for the entire service, even if exempt.

EXEMPTIONS FROM CO-PAYMENT

due to pathology or socio-economic reasons

WHAT IT IS

Those enrolled in the National Health System (SSN) who do not have any exemptions, participate with a fee (called **co-payment**) in the health expenditure with a maximum amount of **36.15 euros for each prescription** filled by the General Practitioner.

Special **exemptions** are provided by law for certain conditions related to **pathology, age, income or unemployment**.

FOR WHO

Those who have an exemption for **pathology** (limited to drugs and specialist services related to the pathology itself) or for **socio-economic reasons** are entitled to the **total exemption from co-payment**:

- code 7R2, exemption for income and age (children 0-6 years and over 65);
- code 7R3 exemption for unemployment;
- code 7R4 exemption for social allowance;
- code 7R5 exemption for minimum pension.

WHAT YOU NEED TO DO

The **exemption for pathology** is obtained when you have a chronic and disabling disease, after it has been certified following a specialist examination.

Those who are entitled to a **socio-economic exemption** certificate (codes **7R2, 7R4, 7R5**) can download the certificate and print it directly by logging on to the Veneto Region Health Portal.

Those who are entitled can apply to one of the district administrative offices of the ULSS to which they belong with a self-certification in which they declare:

The registration with an employment center

To have previously worked

Not to exceed the income limits set by the exemption you are applying for

Indigent political asylum seekers are entitled to an unemployment exemption certificate (code 7R3).

CO-PAY AND EXEMPTIONS

for pharmaceutical assistance

WHAT IT IS

The Veneto region provides a **co-payment for drugs of 2.00 euros per package** and up to a **maximum of 4.00 euros per prescription**.

In the case of drugs with the same active ingredient but different price (also called **"equivalent drugs"** or **"generic drugs"**), the SSN provides the less expensive medicine free of charge.

If the citizen requests the more expensive drug instead of the corresponding "generic", they will have to pay the difference between the price of the requested drug and the reimbursement price of the "generic".

FOR WHO

THOSE WHO DO NOT PAY THE FIXED FEE OF 2.00 EUROS PER PACKAGE:

Deaf-mute and blind people

Harmed by compulsory vaccinations, transfusions and administration of blood products

Some types of patients treated with opioid analgesics in pain therapy

War invalids receiving direct and life-long pensions

Victims of terrorism and organized crime

Victims while serving in the armed forces

100% disabled civilians

Disabled civilians under the age of 18 with attendance allowance

Disabled for first category service

Severely disabled from work

Subjects in possession of exemption for rare diseases and for chronic and disabling pathologies

Assisted exempt for income reasons (IRPEF)

WHAT YOU NEED TO DO

Those in any of the categories described above are automatically exempt from payment if the General Practitioner reports the exemption on the prescription.

SCREENING AND PREVENTION

WHAT IT IS

Screening is intended to promote early diagnosis to reduce mortality and increase the chances of treatment and recovery. It is aimed at all people in the **age group** in which the **risk of falling ill is highest**.

The **Veneto Region**, to promote **prevention** and **early detection** of cervical (uterine cervix), breast and colorectal cancers, has activated in all ULSS three specific and corresponding **screening programs**.

FOR WHO

Screenings are offered to the entire population in the most at-risk age groups, and it is important to do them even if you are in good health.

25-64

Cervical cancer screening is for **all women** living in the Veneto region **between 25 and 64 years**.

50-74

Mammography cancer screening is for **all women** living in the Veneto region **between 50 and 74 years**.

50-59

Colon rectal cancer screening is for **all people** living in Veneto **between 50 and 59 years**.

WHAT YOU NEED TO DO

The invitation letter to take the test arrives **directly at home** to people in the relevant age groups by the ULSS they belong to.

If you belong to the relevant age group and you do not receive the invitation letter, ask your doctor and the offices dedicated to screening. Find out from your doctor if there are other screenings available in your ULSS free of charge for the population (e.g., Hepatitis C, PFAS, cardiovascular) and how to access them

If the exam response is **negative**, the person receives a communication from the ULSS they belong to and, after the scheduled interval, a subsequent invitation.

If, on the other hand, the answer is **positive**, the person is contacted by the ULSS to perform further follow-up examinations.

WAITING NO

None

COST

All three screenings are free of charge

FAMILY COUNSELLING CENTRES

WHAT IT IS

Family Counselling Centres are social-health services that **can be accessed by all citizens**, including immigrants (regular and non-regular), to benefit from various health and social services, all free of charge, usually provided without an appointment.

The **professionals who work in the counselling centre** are gynecologists, obstetricians, pediatricians, social workers, nurses, and psychologists, who may be joined by other professionals such as a sociologist, child neuropsychiatrist, legal counselor, and linguistic-cultural mediator for migrant citizens.

THE PURPOSES OF THE SERVICE ARE:

To provide health, psychological and social assistance for preparation for responsible motherhood and fatherhood, both biological and adoptive, also through birth coaching and parenting support courses

To ensure psychological and social assistance for couple and family problems

To provide obstetrical gynecological care throughout the pregnancy

To promote and support breastfeeding

To provide medical, psychological and/or social counselling before and after Voluntary Termination of Pregnancy (IVG)

To counsel about contraception, infertility, sexual issues, menopause

To provide pre- and post-adoption information, awareness, assessment, and support

To intervene, in cooperation with judicial bodies, in child protection situations in line with current regulations.

FOR WHO

The Family Counselling Centre is a service of care, support and counselling for **individuals, couples and families**. The services are offered to people up to the age of 65.

CONTRACEPTION COUNSELLING

WHAT IT IS

The purpose of contraception is to **plan, control, or prevent pregnancy.**

There are different contraceptive methods: some are used **before sexual intercourse** (hormonal contraceptives and intrauterine devices), others are used **during sexual intercourse** (condom, diaphragm, spermicides). There are also **natural methods** (basal temperature method, Billings method) that indicate the period of abstinence from sexual intercourse.

Emergency contraception, instead, is an **occasional measure** to be used after unprotected or inadequately protected intercourse. It is not to be understood as a regular replacement for the contraceptive method and, precisely because of its emergency nature, it is not a pill that can be taken after every sexual intercourse. Emergency contraception does not need a prescription for those over 18 years of age.

FOR WHO

Women or couples interested in **initial counselling and monitoring** on the use of **contraceptive methods.**

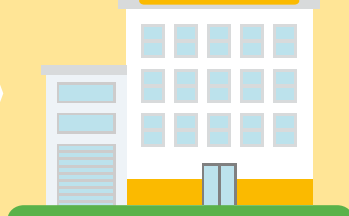

At Family Counselling Centres it is also possible to receive counselling for **emergency contraception**.

WHAT YOU NEED TO DO

Contact the nearest **Family Counselling** office and book an appointment.

COUNSELLING CENTRE

Access is **open to all** and is **free of charge**; a doctor's referral is not required.

COUNSELLING AND ASSISTANCE

on voluntary termination of pregnancy

Voluntary interruption of pregnancy (IVG) can be performed within the 90th day after conception for health, economic, social or family reasons. It is regulated by Law 194/1978, which stipulates access terms and conditions.

Counselling centres offer the opportunity to conduct specialized consultations with gynecological doctors, psychologists and social professionals with the aim of identifying a treatment that concerns the person even before the contingent problem.

There are two techniques for carrying out a voluntary termination of pregnancy:

- pharmacological method
- surgical method.

The pharmacological method can be used up to 63 days equal to 9 completed weeks of gestational age at adequately equipped public outpatient facilities, functionally connected to the hospital and licensed by the region, as well as counselling centres, or day hospitals.

The surgical method can be used, under general or local anesthesia, at public facilities of the National Health Service and private facilities contracted and licensed by the Regions.

At any point along the path, the patient can request additional discussions with a gynecologist and, if she wishes, even during hospitalization, to speak with an experienced psychologist.

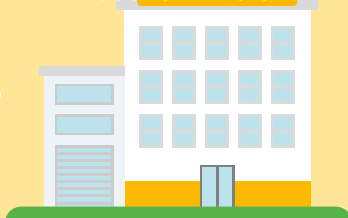

FOR WHO

The service is aimed at pregnant women within the 90th day of conception.

WHAT YOU NEED TO DO

You can contact the Counselling Centre even without an appointment.

COUNSELLING CENTRE

IVG certification can also be issued by the attending doctor or gynecologist, and there is no form of conscientious objection.

INFO AND CONTACTS

For addresses and contact information of counselling centres go to PAGE 56 and for obstetrics and gynaecology operating units go to PAGE 68

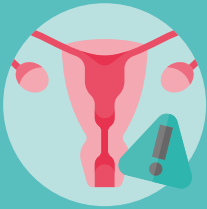

GYNAECOLOGICAL EXAMINATION

WHAT IT IS

The **gynaecological examination** begins with an **interview** to give the doctor **important information about the general health status** of the patient, her personal medical history and her **lifestyle**. This is followed by the examination, which consists of the **inspection of the external genitalia** and of the **vagina**.

Upon evaluation by the doctor, the following tests can be performed immediately:

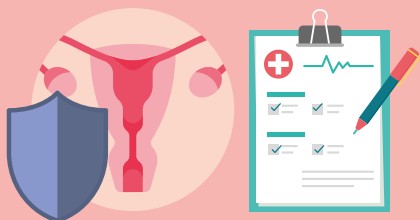

- **the PAP smear**, to discover any uterine tissue problems and early stage cancers;
- **the HPV test**, to detect possible Papilloma virus contamination;
- **pelvic ultrasound**, to see if cyst formations, fibroids, pelvic inflammatory diseases are present.

At this point the doctor can **make a diagnosis** or, if problems has been detected, prescribe further examinations and tests.

FOR WHO

Regular checkups are recommended starting at puberty and/or the onset of sexual activity.

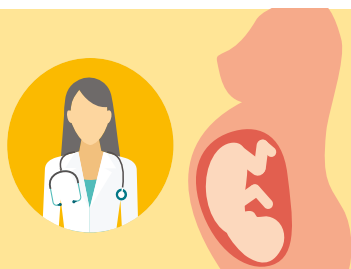

It is a **preventive measure** to avoid or discover in time **diseases**, disorders and problems such as **pelvic pain, vaginal burning, pain during intercourse, vaginal discharge, early contractions**.

WHAT YOU NEED TO DO

Gynaecological examination can be done at **Family Counselling Centres**, even without a referral, **free of charge**.

COUNSELLING CENTRE

There are specialist doctors who also perform examinations and checkups during **pregnancy** and gynaecological consultations in the period following **delivery**. **Obstetrics and Gynaecology operating units** can also be contacted for more information.

WAITING

By appointment

COST

At **Family Counselling Centres** the gynaecological examination is **free of charge**

FIRST-LEVEL OBSTETRICAL ULTRASOUND SCANS

WHAT IT IS

The **first-level obstetrical ultrasound scans** are so named because, in an uncomplicated pregnancy, **they represent the basic ultrasound scans sufficient alone to follow in the most correct way the evolution of the entire pregnancy.**

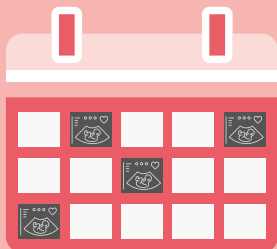

First trimester ultrasound is used to confirm pregnancy, determine the **date of conception**, determine whether it is **one or more fetuses** (single or twin pregnancy).

After the first one, it is important to **schedule second and third trimester ultrasounds** that are used to study the baby's organs and to monitor the baby's growth.

Second-level obstetrical ultrasound scans, instead, are required if a pregnancy has problems (maternal diseases, suspected fetal malformations, placental defects). They should be done only at the doctor's request.

2ND
LEVEL

FOR WHO

Obstetrical ultrasounds should be done to expectant mothers following a **specific schedule**:

- within the 12th week for the **first trimester**
- between the 20th and 23rd week for the **second trimester**
- between the 32nd and 34th week for the **third trimester**

WHAT YOU NEED TO DO

The referrals for the **three obstetrical ultrasound scans** (with any exemption codes) should be filled out by the **General Practitioner** or by the **Specialist Gynaecologist** and then booked at the **Single Booking Center (CUP)**.

For more information, contact the Operating Unit of **Obstetrics and Gynaecology**, or alternatively the **Family Counselling Centre**.

WAITING

By appointment

COST

For obstetrical ultrasounds, **the co-payment is required** (except for exemptions)

INFO

<http://www.salute.gov.it/portale/donna/homeDonna.jsp>

For addresses and contact information of counselling centres, go to **PAGE 56** and for obstetrics and gynaecology operating units go to **PAGE 68**

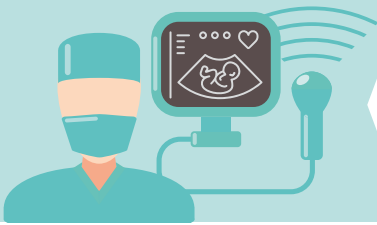

BIRTH PATHWAY

WHAT IT IS

The **Birth Pathway** provides comprehensive care from the preconception period and throughout pregnancy to the day of delivery.

The program consists of several services: **specialized counselling for couples**, **pregnancy assistance**, diagnostic and therapeutic pathways for **high-risk pregnancy**, **childbirth preparation courses** and **breastfeeding**.

The **Birth Pathway** has facilitated access channels, designed to enable future parents to experience the waiting period peacefully in a welcoming and supportive atmosphere.

All mothers who request it are offered the opportunity to **give birth anonymously** and safely **entrust the newborn** at the hospital facility where the delivery takes place.

FOR WHO

The Birth Pathway is aimed at all future parents with special attention to the mother and the baby.

COUNSELLING CENTRE

WHAT YOU NEED TO DO

It is necessary to contact the Operating Unit of **Obstetrics and Gynaecology**, or, for more information, the **Family Counselling Centre**.

WAITING

Based on the service chosen within the Birth Pathway

COST

Co-payment is required for some of the services within the Birth Pathway (if not exempt)

INFO

<http://www.salute.gov.it/portale/donna/homeDonna.jsp>

For addresses and contact information of counselling centres, go to **PAGE 56** and for obstetrics and gynaecology operating units go to **PAGE 68**

FOR THE NEWLY BORN

- **Enrolment in the National Health System (SSN)**
- **Issue of the health insurance card**
- **Assignment of the Primary Care Pediatrician**

WHAT IT IS

The registration of newborns in the National Health System (SSN), with the issue of the health insurance card, is used to give the child access to healthcare services in Italy and for the assignment of a **Primary Care Pediatrician**.

The Primary Care Pediatrician, or **Family Pediatrician**, cares for children and young people from 0 to 14 years of age.

THE PEDIATRICIAN IS ADDRESSED FOR:

Outpatient and home visits

Dressings

Stitches removal and pharyngeal swab

Drug prescription

Request for specialist visits

Clinical tests (blood tests)

Instrumental diagnostics (ultrasound and radiology)

The choice of a pediatrician is mandatory for all children from 0 to 6 years, while it is optional from 6 to 14 years (at these ages a General Practitioner can also be chosen).
Some services and certificates may be subject to a fee.

FOR WHO

Parents of newborn children who want to enrol their children in the National Health System (SSN) to get a health insurance card and a pediatrician.

WHAT YOU NEED TO DO

Parents can apply to the **district administrative offices** with a valid identity card, the residence certificate, the birth certificate, the tax code of the child. The procedure can also be done online.

WAITING **NO**
None

COST **NO**
Free

For information on the addresses and contacts of the district administrative offices, go to **PAGE 16**

INFECTIOUS DISEASES AND VACCINATIONS

WHAT IT IS

The Hygiene and Public Health Service (SISP), which is present in every ULSS in the Veneto Region, is responsible for **vaccinations** and **surveillance** on the progress of **infectious diseases**.

Some infectious diseases can be prevented, and one of the most effective and safe tools is the **vaccine**.

The **main preventable diseases** for which **vaccination is offered free of charge** under the current National Vaccine Prevention Plan are:

- poliomyelitis;
- diphtheria;
- pertussis;
- viral hepatitis A and B;
- mumps;
- shingles;
- the flu;
- measles, chickenpox and rubella;
- rotavirus infection;
- tetanus;
- meningitis and haemophilus influenzae.

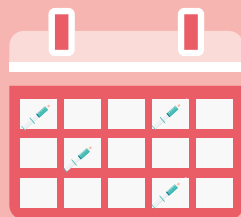

On 27 December 2020, the European vaccination campaign against COVID-19 started. Vaccines are offered to the entire population, according to a nationally established order of priority that takes into account several factors: disease risk, vaccine types, and availability.

The primary cycle of vaccination is planned for all individuals of 5 years of age and older. For the age group 6 months - 4 years (included), the vaccine is recommended for children with fragile conditions, such that they may be exposed to the development of more severe forms of infection, and is also available, at the request of the parent or parental guardian, for vaccination of all other children in this age group.

FOR WHO

Adults and children according to the **National Vaccine Prevention Plan** which provides all regions with the reference vaccination calendar so that **the right to vaccination prevention can be uniformly guaranteed.**

WHAT YOU NEED TO DO

Contact your general practitioner and the individual **vaccination sites** of the Public Hygiene and Health Service (SISP) present throughout the territory of the ULSS you belong to.

For some vaccines made on specific request and for vaccines against particular diseases when traveling to high-risk countries, it may be necessary to book through the Single Booking Center (CUP).

WAITING **NO**
None

COST
Vaccinations under the **National Vaccine Prevention Plan** are free of charge

HYGIENIC-SANITARY SUITABILITY

OF THE ACCOMMODATION

WHAT IT IS

It is a **certificate attesting the hygienic-sanitary suitability of the accommodation** and also includes an indication of how many people can live in the housing itself, taking into account the number of rooms, surface area and services.

THE HYGIENIC-SANITARY SUITABILITY OF THE ACCOMMODATION IS ESSENTIAL FOR:

Signing the residence contract for subordinate work (Art. 5-bis of Legislative Decree 286/98)

Obtaining a residence permit for self-employment (Art. 26 of Legislative Decree 286/98)

Applying for family reunification (Art. 29 of Legislative Decree 286/98)

Obtaining a residence permit for family reasons (art. 30 of Legislative Decree 286/98)

Obtaining the EC long-term resident permit (Art. 9 of Legislative Decree 286/98)

FOR WHO

The certificate of hygienic-sanitary suitability of the accommodation can be requested by **all citizens, EU or non-EU nationals**.

WHAT YOU NEED TO DO

Contact the municipalities where you are resident or domiciled.

WAITING **YES**

Waiting time communicated at the time of the request

COST

The certificate of accommodation suitability requires two revenue stamps of €16. The municipality may also set a fee for the inspection

YES

PUBLIC RELATIONS OFFICE (URP)

WHAT IT IS

The Public Relations Office (URP) accompanies citizens in their relationship with the ULSS and in their pathways to use services, ensuring a transparent and integrated communication. It represents the first point of reference for any kind of information, request or submission of complaints regarding healthcare services, with respect to which it is obliged to provide a response, and for any proposals to improve services.

FOR WHO

All citizens and associations who want information of any kind regarding the organization of the ULSS; directions on how to access services; opportunities to report inefficiencies or forward letters of appreciation to the ULSS.

WHAT YOU NEED TO DO

It is possible to go in person to the counters that each ULSS provides within its area of responsibility, or to call, e-mail or fax. In some ULSS, the service can be accessed directly on the URP website
